

BRAIDSIDE INTEGRATED PRIMARY SCHOOL

# AUDIO VISUAL SYSTEM

INTERACTIVE TOUCH-SCREEN DISPLAYS PROVIDED BY SCS LTD...

County Antrim-based comms systems providers, Synchronised Cabling Solutions (SCS), are industry leaders in the design and installation of voice/data networks and audio/visual solutions across the UK and Ireland.

“Here at SCS Ltd, we understand that each school is unique. Braidside Integrated Primary School asked us to deliver an advanced and flexible classroom solution which directly addressed the needs of their teachers,” says Director Andrew Smyth. Meetings, site visits and onsite demonstrations were conducted with the school to specify the perfect interactive whiteboard system.

The solution was the Promethean ActivPanel. “It delivers a natural writing experience, provides apps at your fingertips, has low running costs, enhanced interactivity, device mirroring and includes award-winning educational software,” says Andrew.

Sixteen Promethean ActivPanels were installed all with electrical height adjustment, one mobile system and on-site training. Covid-19 has had a major impact on all businesses and working lives. SCS adapted to the changing circumstances by implementing a new safety method statement, ensuring the correct PPE is used and taking measures to allow social distancing.

Working closely with all contractors throughout the project ensured they hit deadlines in a constantly evolving situation due to Covid-19. The end result is a world-class teaching solution.

“It is richly satisfying for us to see schools deliver first-class lessons to their students using our latest technology,” said Business Development Manager Nigel Johnston. It was also great to work with Braham Electrical again having recently completed similar projects with them at Our Lady’s Grammar, Newry and Woodburn Primary.”
